Description

PixelPro indoor fixed LED display features a die-casting aluminum cabinet with a sleek design and excellent heat dissipation. CNC technology ensures a stitching gap of less than 0.2mm for a seamless visual experience. With cable-free connection and tool-free installation requiring no steel structure, it offers reliability and convenience. Front maintenance is supported, making it ideal for various indoor applications.

Super Visuals

immerSiv media panels are designed big scan rate, thus more IC drivers are used to perform faster and better, so to have high refresh & good greyscale. In addition, the panels are calibrated and entire look of the media wall is like one consistent piece.
