Description

The Holoflex features a frameless design with a PCB board and hollow mesh circuit. Ultra-light and ultra-thin, with a thickness under 2mm, it can be bent or cut and seamlessly integrated into transparent glass. Powered by a self-developed IC, it delivers exceptional driving power and over 80% transparency, crafted with high-quality materials and advanced craftsmanship.

- Equidistant Pixel Layout for clearer visuals.
- Integrated LED Driver with Static Scanning for more stable images.
- 16-bit Grayscale for finer and more detailed colors.
